PROFESSIONAL SUMMARY

B.Tech CS (Data Science) graduate with full-stack development experience from internships at YOZORA Technologies and Enkonix Software Services, building ELearning platforms, payment integrations, and back-end APIs with React.js, Node.js, and Python. Self-driven in independently shipping production AI/LLM-powered projects and apps, from CRM automation platforms to a published Android app.

TECHNICAL SKILLS

Languages	Python, SQL
AI & ML	Machine Learning, NLP, Supervised/Unsupervised Learning
Data Science	Data Analysis, Model Evaluation, EDA
Web	Flask, Next.js 14, React, Tailwind CSS, REST APIs
Databases	SQLite, PostgreSQL, MySQL
Tools	Git, GitHub Actions, Vercel, Docker, n8n

EXPERIENCE

Web Development Intern, YOZORA TECHNOLOGIES PRIVATE LIMITED Feb 2026 – Jun 2026
Hyderabad, India

- Developed an ELearning platform for streaming online courses and internships, including integration of a payment gateway for course enrollments.
- Collaborated with cross-functional teams using React.js and Node.js to build user-friendly interfaces and back-end APIs.

Web Development Intern, Enkonix Software Services Jun 2025 – Sep 2025
Bengaluru, India

- Built full-stack web projects using WordPress, React, Node.js, and Python, creating dynamic front-end interfaces and robust back-end APIs.
- Developed automation scripts to deliver efficient, scalable, and user-friendly applications across multiple platforms.

PROJECTS

Kinetic – Premium Media Downloader Platform 2026
techpick.tech/downloader

- Built a full-stack media curation platform supporting 4K Ultra HD video extraction and 320kbps Hi-Fi MP3 audio downloads from YouTube, Instagram, X/Twitter, Reddit, and Pinterest.
- Engineered a server-side asset decryption pipeline for instant media retrieval with cloud-synced download history and a streamlined three-step UX.
- *Tech: Next.js, React, Node.js, Tailwind CSS, REST APIs, Vercel*

AI-Driven CRM Automation Platform 2025–2026

- Built autonomous lead generation and CRM system using Llama 3.1 and Google Gemini for AI-powered intent analysis, lead scoring (0–100 scale), and personalized outreach generation.
- Implemented event-driven serverless architecture with Next.js, PostgreSQL, and Prisma ORM; built a Kanban dashboard with drag-and-drop and real-time WebSocket sync.
- *Tech: Next.js 14, React, PostgreSQL, Groq API, Vercel, Cloudflare*

Halo – Task Management App (Prism Apps) 2026

- Independently designed, built, and published Halo, a task management Android app, live on the Amazon Appstore under personal developer brand Prism Apps.
- Implemented ad monetization via Google AdMob alongside core task organization and productivity features.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Data Science) 2022–2026
Madanapalle Institute of Technology and Science CGPA: 8.24/10

CERTIFICATIONS

Google Data Analytics (Coursera) | AWS Cloud Practitioner (Gold – 74%) | Full-Stack Web Development
React.js Advanced Concepts | Docker Fundamentals – Simplilearn
